- White wire • Brown wire • Green wire
- M5 -Mini-light sets • G12 Raspberry Mini-light sets
- Incandescent Mini-light sets

Why Choose LED?

- LED Bulbs use less power and produce less heat than incandescent bulbs, saving you money on your energy bill.
- C-7 and C-9 LED bulbs pull approximately 0.4 watts compared to incandescent bulbs that use 7 watts.
- LED envelopes are extremely durable, made from reliable plastic.
- Display Sales is proud to sell Light Bar LEDs, which give off more light than traditional SMD bulbs and are more resilient than delicate filaments.

Incandescent Bulbs

TRANSPARENT INCANDESCENT BULBS
